DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear if the “a lower portion” in item (iii) is the same as the lower portion recited in item (ii).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Klein et al (US 2,818,293).

Klein discloses a trophy comprising a supporting base having an upper surface and a lower surface (see Fig 1). A decorative member is connected to the supporting base and the decorative member comprises a molded body (members 12-14 in Fig. 1) with a front surface having a central portion circumscribed by a marginal portion, a back surface having an upper portion and a lower portion (members 12 and 16 in Fig. 2) and the lower portion having a first threaded bore formed (see Fig. 2).

Art Unit: 1775.

Klein also discloses a lower portion (figure 14 in Fig. 1 and Fig. 7) having a second threaded bore and a pair of spaced apart surface engaging protuberances formed thereon (see Fig. 7).

The decorative member disclosed by Klein is connected with the supporting base and the connector comprises the threaded rod having the first threaded end threadably receivable within the second threaded bore of the lower portion of the decorative member (See Fig. 1-7).

With respect to claim 2, Klein discloses that the threaded rod has the threaded second end and in which the trophy further comprising a nut threadably connected to the second end of the threaded rod (see Fig. 7).

With respect to claim 3, Klein discloses that the supporting base has a cavity for housing the nut and at least a portion of the second end of the threaded rod (see Fig. 7).

With respect to claim 4, Klein discloses that a spacer disposed between the supporting base and the decorative member and the threaded rod extending through the spacer (see Fig. 2).

Allowable Subject Matter

3. Claims 5-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 9-18 are allowed.

Art Unit: 1775
